

# Safety Instructions

## Recomendation

According with our experience we recommend to decorate with the LED just one slipper (this will depend on your patience to sew by hand).

# Slippers

*Create your own  
light slippers*

## Materials & Tools

- felt
- needle
- plastic needle
- woolen yarn or similar
- sewable LED lights
- conductive thread
- remember to choose the decoration for your LED

# Slippers

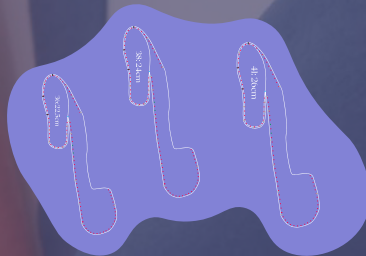

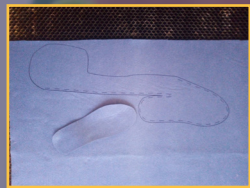

## Step by step instructions

### Process overview

- Step 1: Cut the fabric
- Step 2: Decoration
- Step 3: Sew the LED
- Step 4: Sew the decoration on top of the LED
- Step 5: Sew the slipper

### Step 1: Cut the Fabric

- If you're going to cut the pieces in the laser you have to create and get ready the designs, cut them in the machine or by hand.
- Check the fabric measurements according to the table of measures

### Step 2: Decoration

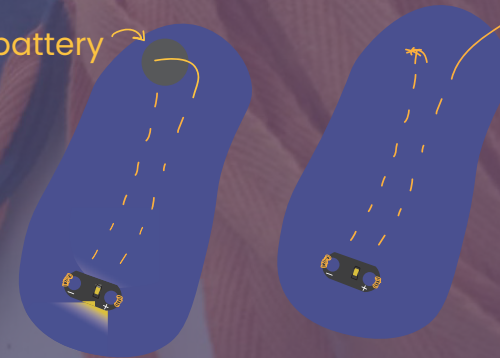

- First of all: imagine the final result by choosing the place of your decoration/LED.
- Remember to put the decoration on top of the slipper, we recommend this because the slipper will have movement.

### Step 3: Sew the LED

- Sew the Led according to your decoration

battery

### Step 4: Sew the decoration on top of the LED

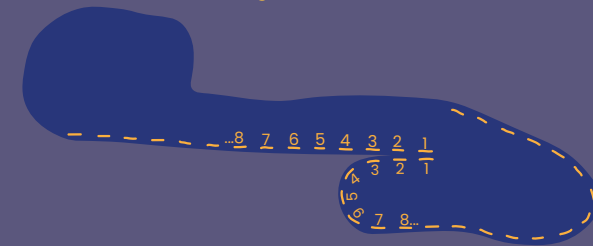

- Start with the strips (piece B and B1).
- Fold in 2 each piece, you can hold the fabric with some pins.

- With the regular needle and some yarn stitch the decoration to the base (remember that the needle has to cross both pieces) -take a look to the yellow line-

### Step 5: Sew the Slipper

- Fold the slippers to give them some shape (follow the instructions in the image)

- **Congratulations you have made your first shoes! :)**
